Sarmat Khachirov

Front-end Developer

👤 Profile

I am Sarmat, 20 years old *Front-end developer.*

Frontend:

- JavaScript (ES6+), TypeScript
- Vue, Vuex, Vue-router (vue ecosystem itself)
- TDD, jest, vue-test-utils
- Nuxt.js(SSR), Gridsome(SSG)
- BEM (CSS), SASS/SCSS, animations
- Webpack, Babel, esbuld — modern dev-tools
- Three.js, WebGL, GLSL, shaders — 3D in browser

Backend:

- Node.js
- REST, WebSocket, GraphQL
- API design
- Express, Koa
- MongoDB, MsSQL

Design, UX/UI:

- Figma, Photoshop
- Blender, Fusion 360 — for 3D

💼 Employment History

Middle Frontend Developer at rixtrema.com, Remote
September 2020 — February 2021

In Rixtrema company, like a contract developer, I have developed and maintained a website builder.

Middle Frontend Blockchain Developer at elastoo.com, Remote
May 2019 — September 2020

In Elastoo company I developed complex blockchain dApps, integrate Ethereum smart-contracts via web3.js.

Projects that I developed in Elastoo team:

nts.fund — This application uses a Ethereum smart contract to manage user funds. I have integrated the Vue frontend with a smart contract via web3.js.

simba.storage — This is the application of the crypto exchange of the custom ERC-20 SIMBA token. The integration with the smart contract was developed by me through web 3, transactions were sent through MetaMask.

localusdt.com — An open cryptocurrency exchange platform inspired by LocalBitcoins and supporting only USDT as the main currency. I have developed the main architecture of the application on the frontend
