Sarmat Khachirov

Front-end Developer

👤 Profile

I am Sarmat, 20 years old *Front-end developer.*

Frontend:

- JavaScript (ES6+), TypeScript
- Vue, Vuex, Vue-router (vue ecosystem itself)
- Nuxt.js(SSR), Gridsome(SSG)
- BEM (CSS), SASS/SCSS, animations
- Webpack, Babel, esbuld — modern dev-tools
- Three.js, WebGL, GLSL, shaders — 3D in browser

Backend:

- Node.js
- REST, WebSocket, GraphQL
- API design
- Express, Koa
- MongoDB, MsSQL

Design, UX/UI:

- Figma, Photoshop
- Interface design
- Blender

My Projects:

- SendEther — VueJS SPA dApp powered on Ethereum blockchain. With this app you can send ethereum coins to anyone. — **Vue • Vuex • Vue-Router • Web3 • Vuetify**
- News Explorer — SRR app for exploring and searching news by categories — **Nuxt • Vuex • SASS**
- Weather App — Fully Vanilla JavaScript App builded on MVC architecture — **Vanilla JavaScript • SASS • Webpack**
- Sarmat Portfolio — My personal website builded on SSG (Static Site Generator)— **Gridsome • Graphql • SASS**

Portfolio:

- Github — my personal GitHub
- SarmatDev — my personal website

💼 Employment History

Middle Frontend Developer at rixtrema.com, Remote
September 2020 — Present

Middle Frontend Blockchain Developer at elastoo.com, Remote
May 2019 — September 2020

Projects that I developed in Elastoo team:

nts.fund — This application uses a Ethereum smart contract to manage user funds. I have integrated the Vue frontend with a smart contract via web3.js.

simba.storage — This is the application of the crypto exchange of the custom ERC-20 SIMBA token. The integration with the smart contract was developed by me through web 3, transactions were sent through MetaMask.

localusdt.com — An open cryptocurrency exchange platform inspired by LocalBitcoins and supporting only USDT as the main currency. I have developed the main architecture of the application on the frontend side using the Nuxt.js framework and completely custom components and styles.

Freelance, Remote
December 2017 — August 2019

As a freelancer, I've to build a bunch of websites on HTML/CSS/JS
